

# Save The Date

## 2010 CIP Congress

November 30 —  
December 2, 2010

Gaylord Resort & Convention Center  
National Harbor  
Washington, DC

The 2010 Critical Infrastructure Protection (CIP) Congress theme is **Manage Risk With Resilience**. The goal of this year's Congress is to provide practitioners in the critical infrastructure security community with solutions, best practices and information so that they can resist, respond and reconstitute their operations in the face of future threats. The event will feature plenary as well as number of breakout sessions in various tracks centered on disciplines such as cyber security, physical security, business resiliency and information sharing partnerships.

*The 2010 CIP Congress is hosted by The National Council of ISACs, The Partnership for Critical Infrastructure Security, InfraGard and the Business Continuity Institute*

*Attendees at the 2010 CIP Congress are eligible for continuing education credits for CISSP and other certifications*
